About

As a full-stack PHP developer, I have acquired a range of skills, including HTML, CSS, Bootstrap, JavaScript, PHP, GitHub, and MVC. I have experience designing websites using the PHP programming language, such as POS systems. I am able to troubleshoot and solve programming issues using problem-solving principles. I am a quick learner and comfortable working in teams. I have also helped build the front end for a company website using WordPress (<https://www.first-city-steel.com/>). I am eager to apply my programming knowledge, expand my skills, and gain new ones.

Education

-Upskilling Program at HTU 340 hours, Oct2022 – Jan 2023
The program covers PHP full stack development, presentation skills, reporting, communication, time management, work ethics, teamwork, leadership, and management skills.
- university of Jordan
bachelor's in computer science, Aug. 2018 – 2022

Work Experience

-UPSKILLING PROGRAM CAPSTONE PROJECT: Point of sale (HTU-CAFFEE), HTU, JAN 2023
point of Sale (POS) web application to handle the store sales transactions and stock. There are many employees with different roles that will work on the POS. The admin of the POS system wants to see quick information on the total sales and transactions in addition to the stock of each item.

-GRADUATION PROJECT: Healer, University of Jordan, JUNE 2022
a website that makes professional therapy accessible, affordable, and convenient, so anyone who struggles with life's challenges can get help, anytime and anywhere. In addition, providing a platform that allows doctors to spread their knowledge and for others to share their stories and experiences.
