About

As a full stack PHP developer, I have a variety of skills, including HTML, CSS, Bootstrap, JavaScript, PHP, GitHub, and MVC and Laravel PHP framework. I have experience designing websites using the PHP programming language. I am able to troubleshoot and solve programming issues using problem-solving principles. I am a quick learner and comfortable working in teams.

Education

- Upskilling Program at HTU 340 hours, Jan 2023 The program covers PHP full stack development, presentation skills, reporting, communication, time management, work ethics, teamwork, leadership, and management skills.

-M.SC. Mechanical Engineering – Renewable Energy - University of Jordan – Jan 2021.

- BSC. Mechanical Engineering-Al Al Balqa Applied University- Jun 2015.

Experience

Portfolio (Laravel framework)

- a portfolio web application using Laravel framework. The web application has a responsive design and is fully customizable. It features a user-friendly interface that allows visitors to easily navigate and view my work.

Duties and responsibilities:

built and customized a project portfolio using the Laravel framework. Leveraging my skills in PHP and Laravel, I transformed the front-end of my portfolio into a visually captivating and user-friendly experience. I implemented a custom design, incorporating unique visual elements, color schemes, and typography that align with my personal branding. Furthermore, I integrated a dashboard feature, enabling efficient project management and providing valuable insights into project progress and performance. This showcases my ability to utilize Laravel's powerful features and deliver a highly functional and aesthetically pleasing portfolio to highlight my accomplishments and skills as a developer."

HTU-STORE (POS)

▪ A web application that can handle customer transactions, track sales and inventory, and provide real-time data to the administrator at HTU's King Abdullah Business Park store.
